Korona-GUN™
Indirect Corona treatment

Highlights:

- indirect corona-treatment
- cold, approx. 40 °C
- efficient, mild pre-treatment
- suitable for all non-conductive materials
- decreases dust
- decreases static discharges
- compact design (38 x 38 mm)
- operation with standard pressurized air
- no exhauster necessary
- no noise protection necessary <75 dB(A)
- no mechanical wearing parts

Technical information:

- electr. power: 200 W / head
- pressurized air: 4 bar, 17 l/min
- connection: 230 V; 50/60 Hz
- weight: 0,6 kg / head
- treatment distance: 5-15 mm
- treatment width: 18 mm

Options:

- several heads at one power supply
- connection to head: 4 m long
